

Group Designations for Measurement Devices

The following is a list of devices approved by the NRSB. These devices were either approved by the EPA Radon Proficiency Program prior to its closure in 1998 or were evaluated and approved by the NRSB since that time.

Caution: NRSB approval of a device does not imply NRSB accreditation or certification of its manufacturer or vendor. NRSB certified radon professionals are obligated to use only NRSB approved radon measurement devices and to ensure that any laboratory analysis and reporting of radon test results is performed by an NRSB accredited laboratory. NRSB accredited laboratories are listed at www.nrsb.org
