Quality Assurance

All Radon Businesses providing **Radon Measurement** services are required to maintain a **Quality Assurance Program**.

Quality Assurance Programs require specific elements, including, but not limited to:

- Quality Assurance Plan (QA Plan)
- Standard Operating Procedures
- Worker Safety Plan

The NRSB recognizes all ANSI/AARST radon standards. **An NRSB certificate holder must follow the standards recognized by the state in which they are conducting business, and their QA Plan must list the standards that are being followed.**

NRSB business registration does not imply NRSB's review or approval of the applicants Quality Assurance Program. The applicant agrees to provide any of the Quality Assurance documents listed above upon request.

Registration of a Radon Business Application

- **An NRSB-certified professional** must be directly responsible for the operation and oversight of the **Quality Assurance Program (QAP)** for the Radon Business.
 - An **NRSB-certified Radon Measurement Technician** may oversee the QAP for self-provided measurement services only.
 - An **NRSB-certified Radon Measurement Specialist *must* oversee the QAP for every other measurement service type, including laboratory and chamber services.**
 - **An NRSB-certified Radon Mitigation Specialist** must oversee the QAP for **mitigation services**.

The designated responsible person understands that failure to maintain a QAP or a Worker Safety Plan in accordance with NRSB requirements may result in the loss of NRSB certification or accreditation.

Use of Accreditation or Certification, and Logo

The applicant will not make claims about NRSB accreditation or certification in a manner inconsistent with the scope of the accreditation or certification issued. The business will not use NRSB accreditation or certification status in any manner that would bring disrepute on the NRSB or be used in a way the NRSB deems misleading. The business agrees to discontinue any claims of accreditation or certification including use of the NRSB logo, NRSB accreditation or certification numbers, and references to NRSB that may be misleading upon suspension or revocation of accreditation or certification.

Code of Ethics for Radon Professionals

The following Code of Ethics serves as an agreement with radon professionals who possess a current NRSB certification. The established rules are necessary to protect the life, health, property and welfare of the public, and to maintain the credibility of the certification program. Accordingly, each NRSB certificate holder agrees to retain full responsibility and liability for their actions and agree to comply with the following Code of Ethics. Violation of this Code of Ethics or failure to

abide by the requirements described by any NRSB certified person might be cause for discontinuing certification.

Responsibility: Protect the safety, health and welfare of the public, by performing all certified activities in accordance with properly established and approved procedures and standards adopted by the National Radon Safety Board.

Integrity: Perform all certified activities honestly and treat the public, clients and employer in an impartial, ethical and professional manner. All details of the certified activity shall faithfully and accurately reflect the inspections; procedures used, and result obtained.

Conflict of Interest: Consciously avoid conflicts of interest and openly disclose such conflicts to all concerned parties.

Improper Conduct: Refrain from work activities outside the area of certification without prior approval.

Safety: Act in a safe and responsible manner while conducting certified activities, ensuring that all required and necessary safety procedures are in place and are being used by yourself and others for whom one is responsible.
